TABAKDOSE VON BERNADETTE
Tabak war die gängige Methode gegen Asthma.
• LIVED HER LAST 13 YEARS - NEVERS
• MISSED LOURDES & HER FAMILY
• SHE DID NOT WANT TO BE A DISTRACTION IN LOURDES

• WOULD HAVE BEEN HAPPY IF SHE COULD HAVE SPENT EVEN A FEW MINUTES IN PRAY AT THE GROTTO WHEN NO ONE WAS AROUND
Yet, she was aware that her work was done and wanted to leave Our Lady of Lourdes to continue her work.

St. Bernadette did not return to Lourdes.

She lived a life of prayer & suffering until she died in the year 1879.
